1. Identification of the substance/preparation and of the company/undertaking

NGAL ELISA Kit (KIT 036) (for research use only)
Catalog No: KIT 036

The NGAL ELISA Kit (KIT 036) is intended by BioPorto Diagnostics to measure the amount of human NGAL in tissue fluids (e.g. plasma, serum or urine), tissue extracts or culture media. For research use only. Not for use in diagnostic procedures.

BioPorto Diagnostics A/S
Grusbakken 8
DK-2820 Gentofte
Denmark

Title: QA & RA Manager
Direct email: cr@bioporto.com

Emergency telephone: 112 (Europe)

2. Hazards identification

None of the hazardous reagents are present in an amount that qualifies the products as hazardous according to Directive 67/548/EC.

However exposure to large amounts and/or ingestion can potentially be hazardous.

3. Composition/information on ingredients

The kit contains the following components: 12x8 coated Microwells + Frame, 5x Sample Diluent Conc., NGAL Calibrators 1-8, 25x Wash Solution Conc., Biotinylated NGAL Antibody, HRP-streptavidin, TMB Substrate and Stop Solution.

No single component contains a hazardous reagent in an amount that requires labeling. The contents in the components of ingredients listed as hazardous are given below:

### 4. First aid measures

First aid personnel should ensure self protection.

- **After inhalation:** Immediately remove the casualty from exposure and move to fresh air. If breathing stops, immediately apply mechanical ventilation and apply an oxygen mask if available. Arrange medical treatment.

- **After skin contact:** Wash off with plenty of water. Remove contaminated clothing. If necessary arrange medical treatment.

- **After eye contact:** Rinse out with plenty of water with the eyelids held wide open. Arrange medical treatment.

- **After swallowing:** Immediately make casualty drink plenty of water, induce vomiting (not if acid is ingested and never in an unconscious patient). Immediately arrange medical treatment.

### 5. Fire-fighting measures

Data for kit component solutions. Not for individual ingredients.

**Suitable extinguishing media**

Use water spray, dry sand, carbon dioxide or foam depending on the surrounding materials and equipment.

**Special risks**

Non-combustible. Ambient fire may liberate hazardous vapors. The following may develop in event of fire: sulfur oxides, mercury vapors, nitrous gases or nitrogen oxides.

### 6. Accidental release measures

**Person-related precautionary measures**

Do not inhale aerosols. Immediately change contaminated clothing.

**Environmental-precautionary measures**

Do not allow to enter sewerage system. Contain spill.

**Procedures for cleaning/absorption**

Take up with liquid-absorbent material. Forward for disposal. Clean up and disinfect affected area.

### 7. Handling and storage

**Handling**

Cannot be stored indefinitely. Expiry date is printed on labels. General good laboratory practice should be maintained. Handle calibrators and unknown samples as potentially infectious.

Take care to keep workplace clean and dry. The substances used should not be present at the place of work in quantities above those required for carrying out the work. Do not leave containers open. Avoid general contact by handling. Compatible materials: glass, plastic.

**Storage**

Store components in the box with the lids tightly closed. Store all components at 2-8°C.

**Specific use**

The product is intended for research use only. Intended for professional use only.

### 8. Exposure controls/personal protection

Data for kit components solutions (not for individual ingredients).

**Personal protective clothing**

Protective clothing should be selected specifically for the working place, depending on concentration and quantity of the hazardous substances handled.
Respiratory protection
Required only in unintentional release of the substance.

Eye protection
Required.

Skin protection
Required. Wear laboratory coat and protective gloves. The glove material must be sufficient impermeable and resistant to the substance. Check the tightness before wear. Protect the skin. The following material is suitable for protective gloves: Nitrile rubber.

General protective and hygienic measures
Foods and beverages should not be consumed in the vicinity of the work area. Wash hands before work breaks and on finishing the work.

9. Physical and chemical properties

Data for kit component solutions (not for individual ingredients)
Appearance: Clear to red solutions, odorless
pH: Neutral except for Stop Solution (pH ~0.6)
Boiling point: NA
Flash point: NA
Flammability: NA
Explosive properties: NA
Oxidizing properties: NA
Vapor pressure: NA
Relative density: NA
Solubility: Soluble in water
Viscosity: NA
Vapor density: NA
Evaporation rate: NA
Additional parameters: NA

10. Stability and reactivity

Stability: Stable. However note expiry date printed on labels. Store at 2-8°C and replace the components at this temperature at the end of the working procedure.

Conditions to avoid: Heating above room temperature, freezing.

Materials to avoid: Generally use only clean glass and plastic suitable for laboratory use for handling the kit components.
Note that individual ingredients are incompatible with strong oxidizing agents, alkaline metals, alkaline compounds, ammonia, alkaline earth metals, (strong) acids, strong bases, metals, reducing agents.

Dangerous reactions: In the case of fire see chapter 5.

Further information: Note that Stop Solution contains sulfuric acid (H₂SO₄) and has a corrosive effect.

11. Toxicological information

Because of the small size of the containers and the low concentrations of hazardous ingredients, the toxicological risks are minor.
Toxicological experiments have not been done on the kit components.
The following toxicological information is for the hazardous ingredients in pure form from ChemIdplus:
Material Safety Data Sheet (MSDS)

Thimerosal (ingredient in 25x Wash Solution Conc.)
Thimerosal is a topical antiseptic used on skin and mucous membranes. It is also used as a preservative in pharmaceuticals. Thimerosal acts as an anti-infective agent, fungicide, bactericide, disinfectant, wood preservative, and germicide.

Acute toxicity
After inhalation: Irritation and/or damage of the mucous membranes of respiratory tract.
After swallowing: Irritation of the mouth, throat, and other tissues of the gastrointestinal system can occur.
After skin contact: Irritation of the skin. Danger of skin absorption.
After eye contact: Eye irritation test (rabbit): Slight irritation of the eye.

Systemic effects of thimerosal exposure
Acute: Metallic taste, nausea, vomiting, abdominal pain, bloody diarrhea, intestinal burns, glottal edema, aspiration pneumonia, drop in blood pressure, cardiac arrhythmia, circulatory collapse and renal failure.
Chronic: Inflammation of the mouth with loss of teeth and mercurial line. The principal signs manifest themselves in the CNS (impaired speech, vision, hearing and sensitivity, loss of memory, irritability, hallucinations, delirium).

Animal toxicological data: LD₅₀ (oral, rat): 75 mg/kg.

Human toxicological data: An oral dose of 29 mg/kg caused degenerative changes in the brain, anorexia and changes in motor activity.
An oral dose of 83 mg/kg caused coma, gastritis, renal tubular failure, dermatitis, gingivitis, delirium, polyneuropathy and respiratory failure.

Further toxicological information: Danger of cumulative effects. Long-term exposure leads to damage of the nervous system.

Bronidox L (ingredient in 5x Sample Diluent Conc., NGAL Calibrators, Biotinylated NGAL Antibody and HRP-streptavidin):
Few data are available.

Acute toxicity
After inhalation: May be harmful after inhalation and irritate the respiratory tract.
After swallowing: Harmful if swallowed
After skin contact: Irritation of the skin. Danger of skin absorption.
After eye contact: May cause eye irritation.

Effects of Bronidox L exposure: Behavioral (tremor), behavioral (convulsions or effect on seizure threshold), behavioral (excitement), skin and appendages (after systemic exposure: dermatitis, other)

Animal toxicological data: LD₅₀ (oral, mouse): 590 mg/kg, LD₅₀ (oral, rat): 455 mg/kg.

Human toxicological data: No data available.

12. Ecological information

Thimerosal
Highly toxic for aquatic organisms. May cause long-term adverse effects in the aquatic environment. Hazard for drinking water supplies.

NCLASS data
Toxicity: L(E)C₅₀ < 1mg/L
Degradation: Readily degradable = No
Bioaccumulation: Log Pow = NA, BCF = NA

ECOTOX data
Fish toxicity: Lepomis macrochirus (Bluegill) LC₅₀: 110 mg/L (24 h)

Bronidox L
No data available

Further ecological information
Do not allow to enter waters, waste water or soil.
Due to the small size of the containers and the low concentrations of hazardous ingredients, ecological risks are minor.

### 13. Disposal considerations

Product: Must be disposed in compliance with the respective national regulations.
Packaging: Must be disposed in compliance with the respective national regulations.

### 14. Transport information

No special transport regulations

- ADR (road)/ RID (rail): NA
- IMDG (sea): NA
- ICAO / IATA (air): NA

### 15. Regulatory information

No single kit component contains a hazardous ingredient in an amount that requires identification and labeling according to EC directives.

### 16. Other information

For research use only.

Read instructions for use before using the product. Observe the general safety regulations when handling chemicals. Good laboratory practice is the best preventive measure to avoid hazards.

The information above is believed to be accurate and represents the best information currently available to us. Data are predominantly from the NCLASS, Ecotox and ChemIdplus databases and the Merck Index.
